

Welcome to The Voice, brought to you by SYNEX Stellr. Stellr may be new for many of our reseller partners, so allow us to tell you what we are about.

Stellr is the digital transformation ecosystem that brings together Cloud, Mobility, and IoT vendors creating programs and solutions our reseller partners have been asking for. Digital transformation, according to Forrester Research, is that "fundamental shift in a firm's organization on how they deliver value and drive revenue. The Ecosystem is the interactive relationship between internal and external stakeholders to deliver that value and create change".

The relationship between end-customer, reseller, vendor and distributor has changed. Stellr fosters that change by bringing vendors together to create solutions, and resellers together to create partnerships and collaboration. This is evident through our Stellr community, and today we are excited to announce the upcoming launch of our Stellr Canada LinkedIn group exclusive to our community members. This group will launch in September and will be a source for collaboration with your peers, as well as with our Stellr vendors, and SYNEX sales and leadership teams. Stay tuned for more details.

If you would like to join our community, please fill in a short profile via this [link to our Stellr site](#), or if you have questions, you can connect with us at stellrconnectcanada@synnex.com.

You can also learn more about our North American Stellr program through [our podcast](#) and our [YouTube channel](#).

SYNNEX Canada & AWS launch an exclusive Partner training series

SYNNEX Canada and AWS have launched an exclusive partner training class. In order to attend the sessions, you need to have an APN account and register at least 14 days prior to each session delivery. The Training topics and dates are as follows:

AWS Solutions Training for Partners: Cloud Practitioner Readiness

Date: 08/06/20 from 10:30am to 5:00pm (ET)

DESCRIPTION: In this fundamental-level course, you will gain an overall understanding of AWS Cloud, independent of specific technical roles. It provides a detailed overview of cloud concepts, AWS services, security, architecture, pricing and support. This course also helps you prepare for the AWS Certified Cloud Practitioner exam.

Register: [AWS SOLUTIONS TRAINING FOR PARTNERS: CLOUD PRACTITIONER READINESS – 08/06/20 \(ET\)](#)

AWS Solutions Training for Partners: Cloud Adoption Framework

DATE: 08/18/20 from 10:30am to 5:00pm (ET)

DESCRIPTION: This one-day workshop mixes strategy and 'how-to planning' derived from our own customer implementation and migration projects. We will expose Partners to the AWS CAF structures and discuss ways to tailor the AWS CAF to your unique customer requirements

Register: [AWS Solutions Training for Partners: Cloud Adoption Framework 08/18/20 \(ET\)](#)

AWS Solutions Training for Partners: Migrating to AWS – Technical.

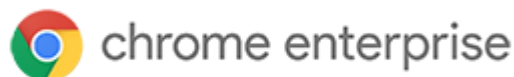

DATE: 09/09/20 from 10:30am to 5:00pm (ET)

DESCRIPTION: This one-day workshop mixes strategy and 'how-to planning' derived from our own customer implementation and migration projects. We will expose Partners to the AWS CAF structures and discuss ways to tailor the AWS CAF to your unique customer requirements

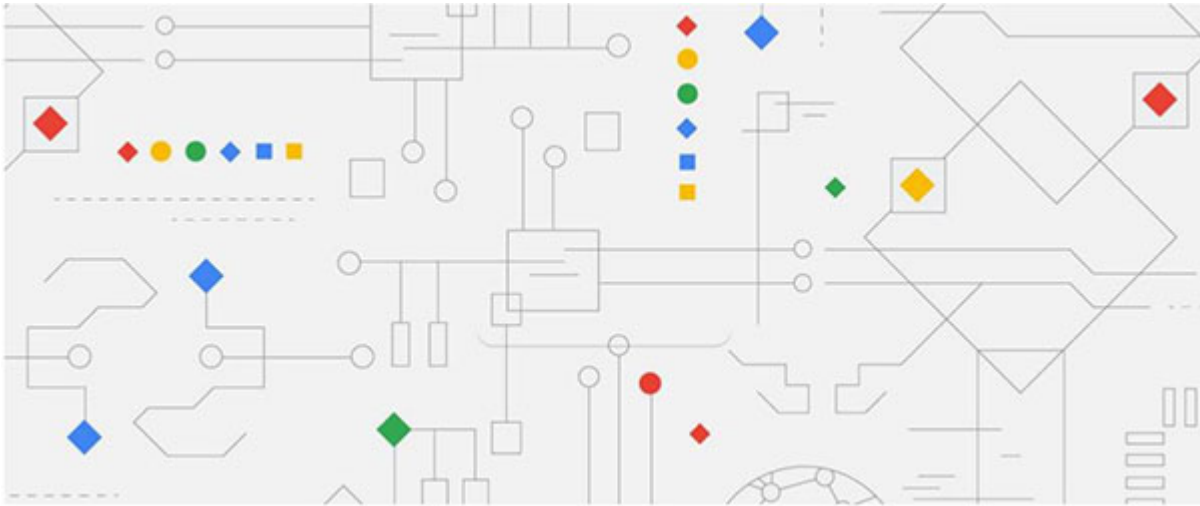

Register: [AWS Solutions Training for Partners: Migrating to AWS \(Technical\) 09/09/20 \(ET\)](#)

IT set free with Chromebook Enterprise

Chromebook Enterprise helps keep your workforce connected, productive and secure from anywhere. Many businesses are looking to quickly identify tools and resources that can help them transition to a remote workforce, while maintaining employee productivity and collaboration.

Chromebook Enterprise combines the end user benefits of Chromebooks with the business capabilities of Chrome OS for IT to power the cloud workforce to work securely and effectively from anywhere.

Some of the benefits are as follows:

- Advanced Security
- 24X7 IT Admin Support
- Easy access to apps

G Suite

Work remotely with G Suite

Help teams stay productive, wherever they are

With G Suite, we've been building toward flexible work environments for more than a decade. Distributed teams need a combination of email, chat, video calling, real-time document collaboration and shared files — all in the cloud to ensure everyone has access to the latest version. It's why customers like [Colgate-Palmolive](#), [Salesforce](#), and [Whirlpool](#) choose G Suite to bring their teams into the future of work.

Designed for flexible work environments

A successful transition to remote work requires more than just video conferencing or real-time chat. It requires a secure, integrated solution that helps people collaborate and communicate, wherever they are.

G Suite is an integrated workspace that powers cloud-based collaboration so people can have impact — wherever they're working from.

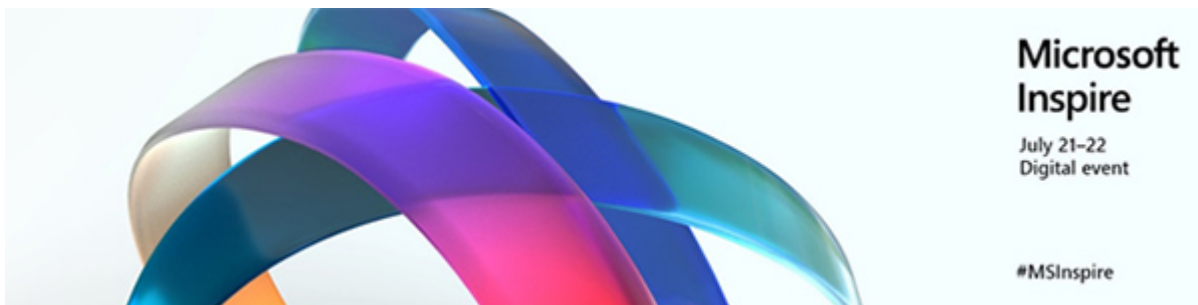

Please [click here](#) to learn more about G Suite's collaborative tools.

For any inquiries please email GoogleCan@synnex.com.

SYNNEX: Your Microsoft Inspire Headquarters MICROSOFT'S BIGGEST conference of the year

For the first time ever, Microsoft Inspire was held virtually. The growing Microsoft team at SYNEX Canada attended a whole host of sessions covering everything from changes to the modern workplace, to capitalizing on the small, medium, and corporate partner opportunity in fiscal year 2021. We received some great insights, got clarity on big bets, and decoded complicated changes announced to the partner ecosystem. These will all be highlighted, discussed and communicated during our upcoming webinar in September, and made easier for all our Resellers to digest and understand! We look forward to seeing you at our webinar and answering any questions you may have from MS Inspire 2020. Stay tuned for more details on our webinar; Inspire with SYNEX!

Partners, we are listening to YOU! The following PROMOTIONS are back by popular demand:

10% back in your pocket! [Learn more](#) about our rebate promotion or contact a [Microsoft BDM](#) to get started.

BitTitan and Microsoft CSP free Migration License Offer. Until supplies last! Qualify for FREE BitTitan User Migration Bundle licenses for O365 or M365 net new CSP through SYNEX. [Learn more!](#)

Can't get an Engineer to Site? Secure Remote Access Puts You "In the Room"

With travel restrictions and increased working from home, you can't rely on a truck roll or a last-minute flight to get you to an [edge location](#) or satellite office. So how do you manage your network infrastructure, when you aren't at the physical location?

Smart Out-of-Band management gives you secure remote access to your critical network devices, wherever they are in the world. [Click here](#) to find out more.

An [Opengear console server](#) at each location, connected to your routers, switches and PDUs, lets you manage, monitor and remediate your network infrastructure from your NOC or home office. And when the primary network goes down, 4G-LTE failover gives you uninterrupted access while you fix the problem.

- Always-on access, even when the network is down
- Remotely configure new devices
- Power cycle PDU and UPS units
- 4G-LTE Failover-to-Cellular

The [Opengear Network Resilience platform](#) now combines Out-of-Band Management with NetOps automation tools. The new NetOps Console Servers provide all the standard OOB features, plus with an x86 CPU, you can run standard [NetOps automation](#) tools like Docker containers and Python scripts.

Smart Out-of-Band isn't just for emergency access. The Opengear platform creates an independent management plane, for Day One, provisioning and everyday use, as well as reliable cellular access when the production network is down.

To find out more, read our [white paper](#) on Out-of-Band Management, or use our [Product Selector](#) to find the right solution for your network.
