

Surface for Business Remote Work narrative 2020

Microsoft Surface

Remote Work with Surface for Business

Stay secure and get it all done with devices designed for work anywhere.

Get things done wherever you work and however you work best

Wherever you work, stay focused to get it done quickly, comfortably, and in your own way.

Connect with your teams to collaborate anywhere

Make real connections with your teams, from secure team meetings to collaborating together on complex projects, with hardware and software designed to bring people together.

Deploy, manage, and stay secure anywhere

Give your organization the freedom to work anywhere while retaining the control you need to stay secure with zero-touch deployment, one-click device management, and protection from Microsoft.

Get things done wherever you work and however you work best

Work comfortably and in your own way to get your job done

Performance and power to get it all done wherever you work. From your essential apps to professional-grade software, Surface devices can do it all with the latest processors, the RAM and storage you need, and all-day battery life.¹

From your home office to your living room couch, choose the way you work your best. From the laptop form factor you love to detachable tablets to the innovative, adjustable Kickstand that adapts to your lap, there's a Surface PC that's perfect for how you work today.

Type comfortably with incredible keyboard² experiences. Every Surface device delivers spectacular typing experiences with mechanical keysets.

Cameras that take your cue. Surface video cameras orient your face from whatever angle you take your virtual meetings, and don't drop your video when you share your screen or reference files.

Use the accessories you need with USB-C[®] and USB-A ports, and headphone jacks. Connect to multiple monitors with Surface Dock,^{*} and wirelessly project to smart TVs when you need a much bigger screen.

When Wi-Fi is unreliable, stay connected anywhere with LTE.³

Navigate naturally with touch on high-resolution PixelSense™ touchscreen displays.

Better than pen and paper. Sketch, write, erase, and capture your thoughts wherever you are with Surface Pen.*

Say it all and more with dual far-field Studio Mics. Record presentations you can't give in person. Write emails and work in Word documents with voice dictation.

Tune into meetings and listen in comfort all day with Surface Headphones. Adjust noise cancellation levels, be heard loud and clear, and hear every word in calls.

Connect with your teams to collaborate anywhere

Enable your team to work seamlessly together

Experience true team flow.

Brainstorm together in Microsoft Whiteboard,* and collaborate across devices when you team with Surface Hub 2S.

Next-level meetings with Microsoft Teams.

Video calls and virtual meetings come to life securely with spectacular audio and video with far-field Studio Mics, Dolby® Audio™ sound, and HD cameras on Surface PCs, and the 4K+ resolution screen on Surface Hub 2S.

Effortlessly collaborate together.

Share ideas easily whether inking handwritten notes, recording verbal feedback, or co-authoring a document. Work together in shared documents in your essential apps.

Deploy, manage, and stay secure anywhere

Enable business continuity for your organization while staying secure and in control

Security is built into every layer, from the hardened firmware adopted from a Microsoft open-source UEFI to the operating system. Surface devices are protected because the Unified Extensible Firmware Interface (UEFI) on Surface devices⁴ is developed and maintained proactively by Microsoft.

Maintain secure control from anywhere. Manage devices right down to the firmware level through the cloud with just a few clicks. Surface is the only manufacturer to have Device Firmware Configuration Interface (DFCI) enabled for modern cloud-based device management through Microsoft Endpoint Manager.*

Reduce IT complexity and eliminate time-consuming corporate re-imaging by shipping and deploying straight to users because Surface is built for the Windows Autopilot zero-touch deployment experience.

Microsoft Endpoint Manager.* Lock and manage devices at the boot level with firmware controls, including the camera, USB, and Bluetooth®.

Microsoft Defender Advanced Threat Protection. Advanced Threat Protection* (ATP) uses cloud-based telemetry to protect against known global threats.

Windows Hello. Keep information secure with easy, enterprise-grade biometric sign-in and eliminate passwords or PINs.

Microsoft 365 Conditional Access. Grant access to data and resources only when a device meets specific criteria like user location, time of day, or other factors you choose.

Windows 10 Pro, the platform you trust. Windows 10 Pro offers advanced security protections, enterprise-level manageability, and enhanced productivity tools.

Work from anywhere with Surface for Business

The Surface for Business portfolio delivers experiences employees love with the choice and flexibility they need to work on their terms from anywhere.

Surface Go 2

Work with your essential apps from anywhere. For a super compact 10" laptop, adjust the Kickstand and pair with Surface Go Type Cover.* Accomplish tablet-ready tasks with Surface Pen.* Our lightest 2-in-1 comes with optional LTE.⁵

Surface Pro 7

The performance you need to get your job done, and the versatility you need to do it your way. The adjustable Kickstand and Surface Pro Type Cover* transform Surface Pro 7 into an everyday laptop, while the 12.5" touchscreen paired with Surface Pen* enables digital inking whenever you need a tablet or portable studio.

Surface Pro X

You're always connected and on-task with Gigabit-speed LTE.¹ Our thinnest 2-in-1 helps you tackle essential laptop tasks when you pair the Surface Pro X Keyboard with the adjustable Kickstand. Sketch and ink with Surface Slim Pen when you need to get ideas down on-screen. At 13", razor-thin bezels and our Surface signature 3:2 ratio combine to create the most efficient amount of space to see your work.

Surface Pro (5th Gen) with LTE

When 4G LTE access is a necessity to see you through your workday, choose our classic 2-in-1 with LTE¹ connectivity.

Work from anywhere with Surface for Business

The Surface for Business portfolio delivers experiences employees love with the choice and flexibility they need to work on their terms from anywhere.

Surface Laptop 3

Get it done wherever you work with a thin, light, touchscreen-enabled laptop. Choose your favorite color and finish, and the size you need whether it's 13.5" or a larger 15" display.

Surface Book 3

Check in code, analyze data, and render graphics from wherever you work with our most powerful laptop. The detachable keyboard gives you more options to work when you need a processor-powered tablet or a powerful studio. Two sizes are yours to choose: 13.5" and 15".

Surface Studio 2

Add a powerful permanent fixture to your home office. From all-in-one desktop computer to 28" touchscreen drafting table, Surface Studio 2 fuels intensive software with a fast processor, blazing graphics speed, and lightning-fast SSD storage.

Surface Hub 2S

Command the room, even from your home, with our all-in-one interactive whiteboard, meetings platform, and collaborative computing device that comes together in an astonishingly light and thin 50" touchscreen display. Bring remote teams together so everyone is seen, heard, and can actively participate with crystal-clear speakers, and the brilliant, 4K+ resolution screen.
