Why our business customers choose us:

- › Business solutions that are reliable, secure and scalable
- › Advanced services and innovative solutions to help businesses prepare for the future
- › World-leading national networks built to support businesses of any size
- › World-class customer experience, and end-to-end support

Our portfolio of products and advanced services for business

Rogers Business Internet

With fast speeds, reliable uptime, DDoS security, options for diversity, redundancy and worry-free 24/7 support, the portfolio of Business Internet solutions allows businesses to stay connected and scale up as they grow.

Wireless

Rogers Business Wireless plans provide flexible options that keeps businesses connected, no matter where work takes them.

Internet of Things (IoT)

Our IoT solutions help companies use connected intelligence for greater business efficiency, insights and innovation. Stay in the know with real-time location, condition and usage of vehicles, shipments, inventory and equipment.

Data Centre & Cloud

Our solutions provide the infrastructure and expertise to help businesses secure their data, scale for growth and focus on new capabilities.

Rogers Unison™

A truly mobile, cloud-based phone system to help team members do their best work and collaborate from anywhere on the device of their choice.

Productivity Suites

Empower employees to connect easily and collaborate with as-a-service solutions like Microsoft 365 and G Suite by Google.

Private Networking

With powerful performance, geographical reach and immediate scalability, private networking solutions from Rogers help businesses fuel collaboration across multiple locations.

National networks built for business

Rogers networks make more possible for businesses across Canada.

- › Canada's largest wireless carrier and most trusted network*
- › Coverage for 97% of Canadians and Extended Coverage to keep customers connected in even more places across Canada
- › We're starting to roll out Canada's first 5G network in Vancouver, Toronto, Ottawa and Montreal.
- › Low Power Wide Area networks that allow IoT customers to deploy large volumes of low-cost devices with low bandwidth and low power requirements
- › Resilient nationwide network includes 72,000 km of robust fibre-optic routes and connections to key network access points in the U.S. and overseas
- › Rogers is #1 in Wireless Network Quality by Consumers in Ontario and in the West by J.D. Power

World-class customer service and support
