Enterprise-Grade Reliability, Best-in-Class Value

Exos X 5U84:

A Small Package with a Punch

Exos® X 5U84, a just-right hybrid RAID configuration, is the datasphere's ultra-dense, intelligent solution for maximum capacity and performance at an exceptionally low TCO.

Exos X 2U12:

Lower Cost Capacity

Exos X 2U12 is an entry-level SAN that delivers advanced data protection, capacity, and performance at an optimal cost.

Nytro X 2U24:

For Demanding Data

Seagate Nytro® X 2U24 is the datasphere's affordable all-flash array (AFA) system for critical workloads that demand the highest performance.

Exos E 4U106:

Industry-First Capacity

Seagate Exos E 4U106 is the datasphere's largest building block delivering industry-first capacity and density without sacrificing data access speed.
