

Citrix products and solutions

Secure digital business for customers while delivering collaboration and productivity solutions their workforce needs.

Over **400,000** customers and

98% of the Fortune 500

trust their business to Citrix.

Citrix Cloud Services

Simplify delivery and management of your Citrix solution offerings to provide world-class, secure workspaces they need—in any cloud or hybrid-cloud environment.

- Thwart attacks before bad actors can compromise customer data without sacrificing user experience
- Streamline IT management through one unified console and deploy automatic actions to enforce policies based on user behavior
- Prepare for the future by offering customers a holistic, scalable solution that grows alongside remote and hybrid-remote work requirements

Citrix Workspace

With Citrix Workspace, organizations are empowered to deliver secure, access to proprietary systems, confidential data, and collaboration tools within an easily scalable environment.

- Enable agility and scalability for remote and hybrid-remote workforces
- Deliver custom workflows that increase employee productivity and collaboration
- Optimize and streamline Microsoft Office 365 migrations
- Deliver zero trust security for users, apps, and data—end-to-end
- Simplify IT management within a single console
- Ensure document security while employees maintain collaboration and access from anywhere—on any device
- Proactively pinpoint threats and thwart data breaches
- Provide world-class, secure employee experiences

App and Desktop Virtualization

Give customers the reliable IT solutions they're accustomed to, no matter their work location and without sacrificing user experience.

- Eliminate traditional VDI lag times and deliver Linux VDI from any device
- Provide digital tools employees need within a secure zero trust environment
- Help customers embrace remote and hybrid-remote work with confidence
- Leverage apps and workflows to streamline processes

Analytics

Quickly resolve customers security threats and performance issues.

- Proactively track user behavior to detect and prevent insider threats before business continuity is ever disrupted
- Leverage machine learning to create user scores that improve user experience, and allow IT to isolate and solve performance challenges in real-time
- Automatically apply policies to any detected internal threats such as malware before a user has been informed

Content Collaboration

Give employees access from anywhere to a shared, secure content collaboration platform.

- Increase productivity and visibility on a unified, single sign-on, and secure, shared content portal
- Simplify content approval workflows across dispersed, remote and hybrid-remote teams
- Help customers leverage flexible storage to scale seamlessly across all app and cloud providers

Unified Endpoint Management

Simplify device management for IT while delivering uninterrupted user experiences on any device

- Allow access from BYO-devices while maintaining visibility through company-owned apps and endpoints without disturbing employees' personal data
- Contextual access and compliance capabilities ensure protection of your customers' sensitive data
- Provide IT organizations with one console for managing all users no matter the number of devices they sign on from

Secure Access

Secure applications from unauthorized access, network-level threats, browser-based attacks, and more—without complicating employee experiences

- Deliver zero trust access and single sign on with a VPN-less solution
- Offer employees easy to use solutions without compromising protection
- Use contexts such as identity, time, and device posture to grant access based on where and how apps are used

App Delivery and Security

Securely provide flawless application user experiences on any infrastructure

- Customers have holistic visibility into their user experience across their environment, that allows for quickly addressing any challenges or unwanted behavior
- Leverage load balancing to optimize performance and alleviate user downtime
- Manage application security across the entire ecosystem from one pane of glass

Application Delivery Controller

Citrix Web App & API Protection and Citrix Application Delivery Management

Deliver secure and enhanced performance across every application on any infrastructure, from all devices

- Help customers transition to microservices-based architectures that shift workloads from on-premises to the public and private clouds of their choice without typical complexity found in a hybrid-cloud environment
- Accelerate troubleshooting to Provide better user experiences and a zero trust posture across all applications and APIs
- Deliver flexibility needed to secure and optimize applications within a customers' infrastructure of choice from one central management console
- Auto-update and deploy APIs and applications to ensure uninterrupted protection

SD-WAN and Secure Access Service Edge (SASE)
