

## Communicate in Color

We've all heard that a picture is worth a thousand words... but how about 4.39 trillion colors? The **ViewSonic® VP2771**. Increasing the value of your message exponentially.

- Screen-wide color uniformity and **Delta E<2 color accuracy** delivers precise, lifelike color perfect for graphic design, photography, and video
- **A dual color** engine lets you simultaneously connect two different sources with two different color spaces for a more flexible work environment
- **Hardware calibration** allows you to fine-tune and maintain color accuracy so that images remain consistent across the cube, across town, or across the globe
- Whether you are working on Mac, PC, or both, flexible connectivity options and an **integrated KVM switch** lets you easily toggle between your preferred systems
- Experience data, video, and audio transmission, as well as charging power, over a single cable with the latest **USB 3.1 Type C input**.
