

Qwizdom™ Solutions for ViewBoard®

Your ViewBoard has already made teaching easier for you and made learning more fun for your students. But did you know that when combined with Qwizdom software solutions, your ViewBoard can do much, much more?

- Qwizdom's award-winning Oktopus™ collaboration software allows users to annotate and work over or alongside any application, existing content, or over a web browser.
- Qwizdom Ximbus™ is a cloud-based whiteboarding and collaboration solution for Google, and features Google Drive and Contacts integration.

 CHOOSE QWIZDOM OKTOPUS IF:	 CHOOSE QWIZDOM XIMBUS IF:
Your school still uses LAN software such as SMART or Promethean.	Your school has a partial/whole cloud strategy, or if Google is your preferred platform.
Your school values legacy content from SMART or Promethean.	Your school has no cloud strategy, but would consider Google.
Your school would like to natively open SMART or Promethean files on ViewBoard.	Your school has a 1:1 device program using Chromebooks or other devices.
Your teachers value tools and open access to content.	Your teachers use Chrome OS, Windows OS, iOS, Android OS, or other.
Your school would like to reduce licensing fees and fixed costs.	Your school uses Google Cast, G-Suite, Drive, Contacts, and Classroom.
Your school would like FREE updates for life.	Your school has legacy content from SMART/Promethean, and would like to create presentations using a variety of file types including documents, slides, spreadsheets, images, videos, and more.
Your school would like a perpetual license as standard.	Your teachers prefer to walk around the class and remotely control the presentation.
Your school will have, or is considering a 1:1 program.	Your teachers prefer 2-way collaboration over a Google resource.
Your school prefers a LAN collaboration solution instead of cloud.	Your teachers would like to have instant polling over Google resources.
