# HALL OF INSPIRATION

911 DISPATCH: FIRST RESPONDERS

You're in for a behind-the-scenes look at some of the most innovative and in-demand products and solutions in IT. See how police and fire departments use a unique blend of state-of-the-art cameras, monitors, and storage – tied together by robust unified communications and united on a secure network -- to support the efforts of those on the front lines in emergency situations.

On the bank of high intensity video displays, you'll see a mix of pre-recorded and live video feeds. Watch as the Panasonic demo police car cruises the streets and its operators interact with the public, all the time automatically pushing a continuous video record to the cloud.

BIG DATA

Once you entered the TD Center, you also entered our world of Big Data collection and analytics. We've gone scanless this year, to demonstrate the cutting-edge beaconing technology that provides us not only with a breakdown of your workshop attendance, but with detailed information about how long you stayed in various sessions, and even which products in the Pavilion drew your interest. While you're here, please note your location, indicated in real time on a Convention Center map displayed on a massive display.

Not only can our Big Data solutions help your customers collect and store more detailed information than ever before, but they also give you powerful tools to help your clients distill volumes of desirable – and actionable – data regarding their customers' habits and preferences.

SECURITY

Welcome to the world of black hats and white hats – but don't worry: In the Hall of Inspiration, even the "bad guys" are here to help you. But don't take our word for it: Let one of our black hat hackers challenge your security! Can your network pass our free scan? We'll even perform a scan of a network belonging to one of your customers, to show you what a powerful sales tool this type of demonstration can be.

Next, our crack team of white hat engineers will show you how our security solutions provide constant monitoring and protection, from firewall to data storage – and provide peace of mind for your clients, both on-premises and in the cloud.

HIGHER ED. IN HEALTH CARE

We're in the lab, cooking up lucrative solutions that will prove valuable in a wide range of environments, from med school to medical practice. The technology that colleges use to train medical professionals transitions from classroom to real-world environments, so here you will see a variety of high-margin products that are in high demand. Some of the hottest technology in the industry will be on display, including keyboards and mice that fight the spread of infectious diseases, carts that create complete mobile workstations that move easily from room to room – even 3D printing from MRIs.

Technology is becoming more and more valuable to the medical community; this display features solutions that cover a range of applications, from electronic medical records to distance learning.

VIRTUALIZATION IN HEALTHCARE
-- MAXIMIZE RESOURCE UTILIZATION
-- HIGH AVAILABILITY
-- DISASTER RECOVERY
-- REDUCED OP EX

PATIENT CARE
-- PATIENT CARE CARTS
-- PATIENT IDENTIFICATION
-- WORK STATIONS
-- MINIMIZE MALPRACTICE
    LIABILITY

5 RIGHTS
-- RIGHT MEDICATION
-- RIGHT DOSE
-- RIGHT TIME
-- RIGHT ROUTE
-- RIGHT PATIENT

SECURITY
-- MEANINGFUL USE - *FEDERAL MANDATE*
-- BYOD *(BRING YOUR OWN DEVICE)*
-- HIPAA COMPLIANCE
-- DATA ONLY STORED IN THE DATA CENTER
-- AVERAGE $810,000 PER INCIDENT

RETAIL

Have you ever seen the beauty of a back-office operation, with systems designed to facilitate inventory tracking, pricing, and even ordering? This is the modern world of retail and the IT products that form the invisible backbone that unite the entire sales process, from showroom to warehouse. Point of sale is truly only a small part of the retail experience. In this exhibit, you'll see solutions that give management granular understanding and greater control over their sales. From wireless scanners in the warehouse to self-service retail-sales kiosks that provide a completely automated experience, the future of retail is here, now.

This display also includes self-service ordering and digital signage. And while you're visiting the retail exhibit, don't forget to pick up your free Targus bag!

INTERNET OF THINGS

In this specially constructed display, you will see how the Internet of Things can drive new efficiencies for the enterprise. The area includes windows and a drop ceiling so that you can experience solutions that will enable buildings to automatically set lighting and thermostats in response to a wide range of environmental variables, including temperature, available lighting, even occupancy rates! The advanced automation controls take their cues from a variety of sensors that continuously monitor a building's status.

Also in this display, you'll get a look at unmanned kiosks that use automated controls to provide everything from blockbuster movies to fresh ice – on demand, perfectly, every time.
