

MT SENSORS

Your spaces just got smarter

Automate and transform your organization with environmental monitoring and data-driven insights.

Prepare any space for the unknown challenges of tomorrow

Take control of your environment

Stop environmental issues before they start with remote visibility and real-time alerts.

See around every corner

Gain complete visibility by combining sensor data with camera intelligence and Wi-Fi analytics.

Enable a more sustainable world

Improve air quality, reduce energy consumption, and drive green initiatives.

Smart sensors. Smarter businesses.

Environmental monitoring

Monitor your spaces to protect people and business assets

Real-time alerts

Flexible alerting options keep you informed anytime, anywhere

Smart connectivity

Automatic and wireless connectivity to MR/MV gateways

Ecosystem ready

Build custom business applications via API or MQTT

Built-in cybersecurity

Encryption and authentication with Cisco Trust Anchor technology

Energy-saving charts

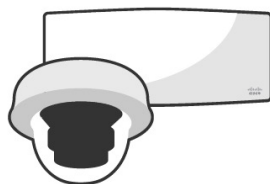

Identify opportunities to increase sustainability

Simplified architecture for rapid deployments

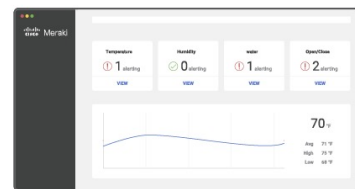

MT sensors
