

Differentiating feature	Multifactor Auth	Health, Adaptive Auth, Policy	BYOD, SSO
Device Trust	MFA	ACCESS	BEYOND
Monitor and identify risky devices	N	Y	Y
Visibility into security health of laptops and desktops (Duo Device Health application)	N	Y	Y
Visibility into security health of mobile devices	N	Y	Y
Identify corporate owned versus BYOD laptops and desktops	N	N	Y
Identify corporate owned versus BYOD mobile devices	N	N	Y
Identify if a third-party agent is enabled on the device (Ex: Anti-virus, Anti-malware)	N	N	Y
Adaptive Authentication & Policy Enforcement	MFA	ACCESS	BEYOND
Enforce policies based on user's location	N	Y	Y
Block Tor and anonymous networks	N	Y	Y
Detect anomalous or risky access	N	Y	Y
Enforce device trust policies based on security health of laptops and desktops (out-of-date software, encryption, firewall, etc)	N	Y	Y
Enforce device trust policies based on security health of mobile devices (encryption, tampered, screen lock, biometrics)	N	Y	Y
Notify users to remediate their devices	N	Y	Y
Limit device access to applications based on enrollment in endpoint management systems such as Landesk, JAMF, Microsoft Intune	N	N	Y
Limit mobile access to applications based on enrollment in MDMs (AirWatch, MobileIron, Microsoft Intune)	N	N	Y
Secure Application Access & Single Sign-On (SSO)	MFA	ACCESS	BEYOND
Secure access to internal company web applications (Duo Network Gateway)	N	N	Y
Secure access to specific internal servers via SSH (Duo Network Gateway)	N	N	Y
Secure remote access to applications hosted in AWS, Azure, and GCP (Duo Network Gateway)	N	N	Y
Price breakdown by end user count (Distribution across product levels)	MFA	Access	Beyond
1 - 500	\$3.00	\$6.00	\$9.00

MFA / 2FA
