

New solutions to **accelerate your move** to Chrome OS

Announcing new capabilities on Chrome OS to support your distributed workforce.

Organizations have made drastic changes to enable their employees to work remotely. Although many businesses are looking for ways to bring employees back into the office, organizations will still need to support remote and field workers.

Google Chrome Enterprise has introduced new capabilities that solve real world challenges and will help IT support a distributed workforce:

Zero-Touch Enrollment

Parallels Desktop for Chromebook Enterprise

Chrome Enterprise Recommended

Chrome OS Readiness Tool

End User Productivity Features

See the next page for more details on each of these capabilities.

Learn more about these new solutions by reading the [Chrome Enterprise blog post](#)

Zero-Touch Enrollment

Chrome OS deploys 76% faster than Windows 10 devices and with the addition of Zero-Touch Enrollment Chrome OS deploys even faster. Zero-Touch Enrollment eliminates the need for IT configuration and allows devices to be drop shipped directly to employees ready to login and use.

Chrome Enterprise Recommended

Easily identify verified solutions and apps that are verified by Google with Chrome Enterprise Recommended for Chrome Browser and Chrome OS to ensure a great employee experience and reduce the risk of compatibility issues.

End User Productivity Features

With updates every 6 weeks, Chrome OS continues to provide a better employee experience over time, with better window management, notification badging and improved tab management.

Parallels Desktop for Chromebook Enterprise

Employees can access legacy applications including desktop versions of Microsoft Office. Parallels Desktop provides offline access to apps with the controls IT needs.

Chrome OS Readiness Tool

Make informed decisions to plan your move to Chrome OS. Analyze your workforce's usage of apps and identify devices that are ready to go fully cloud-based or ready to switch with support of virtualization, using this free and easy to deploy tool (coming in 2021).
