Why Chrome OS

Plan your hybrid work and return to office strategy with Chrome OS

Chrome OS is a modern, secure, cost effective platform that is the only cloud-first platform designed to support hybrid work and your return to office strategy.

Management of your hybrid workforce

Chrome OS enables IT to manage distributed devices from anywhere.

User profiles stored in the cloud

With data and user profiles stored in the cloud, it's easy for employees to access the info they need remotely or at shared hotdesks in the office.

Easy access

Employees can sign into any device and pick up where they left off.

Solution integrations

Chrome OS has solution integrations, like BeyondCorp Enterprise, that enable secure and productive remote and hybrid working models.

Chrome Enterprise

These partners are included in our Google Chrome Enterprise Ecosystem, providing value and diversity to your Chrome Enterprise customers.

Google's Titan SECURITY KEYS

Google's Titan Security Keys are phishing-resistant two-factor authentication (2FA) devices that help protect high-value users such as IT admins. Titan Security Keys work with popular browsers and a growing ecosystem of services that support FIDO standards. Available as a USB or Bluetooth device.

CAMEYO

Unlike traditional application virtualization products, Cameyo's application Platform as a Service (aPaaS) cost-effectively and securely delivers Windows applications to users on any device. It is the only solution that is built for the cloud and runs in any customer environment – public or private cloud, hybrid, or on-premise.

Sky rocket your migration to G Suite. Become the Boss of all "usage" related activities and orchestrate your organization's move to G Suite. Understand, in real time, which departments or even which specific users are using old tools and find out why. Maximize your existing Google apps investment by increasing the adoption of G Suite and downside your investment in MS Office licenses by up to 90%.

Black Pearl Mail is a full end to end enhancement to traditional email and is a simple add-on to G-Suite. You can provide powerful, immediate benefits to your customers with analytics, banner messaging, and signature management – you can even help them avoid brand embarrassment from Dark Mode in less than 5 minutes!

Google has launched a new effort to help companies implement a program similar to one they're using internally that helps eliminate downtime due to device failures. "Grab and Go" has minimized downtime and allowed companies to focus time on more strategic initiatives.
