## Reasons to Love LapCabby

**No matter the device** – We have a product to sync, store and transport them. Laptops, Chromebooks, Tablets, BYOD, 1:1, 2:1, 3:1 - we have you covered!

**Health and Safety** - To ensure the safety of all our products is comprehensive, we test to the highest safety standards worldwide. We never self-certify; every product is subjected to stringent third-party testing by the international test house, TUV.

**What you see is what you get** – Our feature rich products come fully assembled and quite literally ready to roll...

**Built from scratch** - All our components are designed and manufactured in-house. We don't do off the shelf!

**Lifetime warranty** – On every LapCabby purchase - we know our design and build quality is unsurpassed!

**Friendly service** – Just because we operate across the globe doesn't mean we have compromised our customer centric ethos.

# Range Overviews

## Sync and Charge on the Go

Boost+ is our portable charging and synchronization unit, charging and syncing up to 16 mobile devices without having to pack them away, making it great for quick power pick-me-ups.

## Universal Range

Our UniCabby is developed to suit various devices up to 14", including Chromebooks, netbooks, laptops and also tablets which all fit snuggly with or without protective cases.

## Portable Range

Our portable GoCabby is designed to accommodate all kinds of USB-powered tablet devices including iPad, Android and Kindle Fire. GoCabby has Cambriionix U16S technology to sync your tablets, and its unique design means you can charge and update devices even when the case is shut and locked.

## Desktop Range

Our DeskCabby fits neatly on a desktop while still offering room for up to 12 USB - powered tablets, making it an ideal charge and sync station for your office or classroom desk.

## Locka Range

LapCabby's Locka enables you to charge and secure a myriad of devices and accommodate a growing mobile user base. With Locka you can create a central 'hub' for devices including Chromebooks, laptops and tablets - to secure your 1:1 deployments and BYOD users.

## TabCabby Compact Range

With a TabCabby Compact you can expect all our usual clever features while saving even more space with a smaller footprint. But don't be deceived by their size; they're still designed to securely store and charge from 20 to 32 tablets.

## TabCabby 32H Range

Our TabCabby units keep any kind of mobile device, including iPads, Android tablets and e-book readers, safe, secure and organized. So long as your tablet has a charger with a conventional power plug, it'll be a perfect fit.

## LapCabby Vertical Range

Vertically store from 10 to 20 laptops up to 19", providing handy sliding shelves for easy access to devices and other features such as extra durable construction, lockable doors and cushioning, protective grips.

## LapCabby Mini Range

Our LapCabby Mini carts hold between 20 and 40 netbooks, tablets and Chromebooks, and, like all of our carts, they're designed to make your life easier.

## LapCabby Horizontal Range

Every LapCabby offers innovative, programmable charging schedules, come in a range of sizes and colors and deliver an effective way to store and charge laptops while keeping cables tidy.
