

GDPR: Is Your Network Ready?

Take action in advance of the **25 May 2018 deadline** for the European Union's General Data Protection Regulation (GDPR).

25
Months

From April '16 to May '18, time to prepare is quickly running out!

Exempt from regulation*

20 or 4%
Million € Revenue

Fines can be substantial

100%
Network Data

Visibility is key to compliance

5 Steps to Take Now

1

Validate your security architecture

Make sure your security is robust and defends against breaches, even at high volume. [Ixia BreakingPoint](#) test solutions can help.

2

Ensure resiliency

Keep security monitoring alive during unexpected outages. [Ixia external iBypass switches](#) can route traffic to backup tool.

3

Monitor encrypted traffic

Do not pass encrypted traffic into your network without inspection. [Ixia visibility solutions with Active SSL](#) expose encrypted traffic to your monitoring tools.

4

Get cloud visibility

Eliminate the blind spots created from cloud computing. [Ixia CloudLens Private](#) and [CloudLens Public](#) give you visibility to cloud-based data traffic.

5

Identify and mask personal data

Protect sensitive or personal information used by your monitoring solutions. [Ixia visibility solutions with Data Masking](#) come with easy-to-use, pre-defined templates.

*GDPR applies to every company that conducts business in the EU or with EU residents—no matter where they are located.
