Audio solutions for medical professionals, administrators, and office personnel

PLANTRONICS HEALTHCARE AUDIO SOLUTIONS

plantronics®

Healthcare professionals do so much more than work in one office setting. Plantronics has the right audio solution for your environment. They are staying connected via PC, tablet, laptop, and by both mobile and desk phones. A quality audio device is essential for providing that critical link to being heard and hearing clearly. Headsets have become an absolute necessity for VoIP calls, PC audio, speech recognition, teleconferencing, and telemedicine. Plantronics audio devices are simple to set-up, use, and are designed to allow you to hear and be heard.

With Plantronics, healthcare professionals have the advantages of increased productivity with hands-free functionality, reduced error rates caused by miscommunication and less risk of phone-related neck and shoulder stress injuries. Through their advanced technologies, many Plantronics audio devices offer better compliance with security and HIPAA privacy regulations.

### Multi-unit charging station

The perfect audio device system for the nurses' station, the Savi system enables workers from multiple shifts to use their own personal Savi headset on a shared five-unit charging station, by removing the headset cradle from the base and placing it on the charger. This helps maintain a more hygienic workplace and reduces costs.
