

TWO LEADERS JOIN FORCES TO HELP YOU MEET YOUR Wi-Fi CHALLENGES

Hewlett Packard Enterprise and Aruba

In May of 2015, HP completed the acquisition of Aruba Networks, adding Aruba's best-of-breed wireless LAN infrastructure and policy management to HP's strong footprint in wired LAN. The shift to mobile-cloud has changed how we think about enterprise and small business networking and is the driving force behind the new Aruba HPE. We now offer an integrated solution that spans the access layer to the data center. We serve businesses that want to stay ahead of the game, support their mobile workforce anywhere, and deploy business apps at warp speed.

Gartner's Magic Quadrant:

In the latest "Magic Quadrant for Wired and Wireless LAN Infrastructure" report, HPE/Aruba Networks has been positioned in the Leader's quadrant for the fourth consecutive year, based on vendors' completeness of vision and ability to execute.

"This is a smart and bold move for HP... The joint solution is a strong on-premises offering that will rival Cisco Systems globally, and should be on the shortlist for small and midsize enterprises, remote branch offices and large campus environments globally and across all vertical markets." - *Gartner*

The New Network - With HPE Aruba Instant™ access points and HPE switches, you have a powerful, secure network solution that will grow with your business.

Aruba Instant Access Points

Powered by the latest 802.11ac technology, Aruba Instant access points feature fast set-up, a built-in management dashboard, and gigabit Wi-Fi speeds – all in one affordable package.

- Simplicity with fast set-up that does not require network expertise, and a free built-in management interface.
- Performance tested 10x faster than competing solutions when connecting lots of mobile devices all at once, and scalability as businesses grow.
- Security with built-in firewall and smart application handling for granular visibility and control.
- Reliability with no single point of failover and network survivability to the last access point.

HPE Switches go together with Aruba AP's

At Aruba we understand that businesses need simple, reliable wireless networks that can be supported with limited IT resources and still provide the connectivity required by today's mobile employees. Aruba Instant wireless access points, when implemented with HPE switches, provide businesses with a Wi-Fi solution that delivers superior performance, business grade security, resiliency and flexibility with the simplicity of zero-touch deployment. Aruba instant is a turnkey business-grade Wi-Fi Solution and does not require network expertise to deploy and manage.

Solution Benefits:

- Attractive price point with investment protection
- Integrated security
- Plug-and-play simplicity
- Enterprise grade Wi-Fi performance
- Built for Mobility
- ClientMatch™ technology provides reliable guest Wi-Fi access for an improved user-bring your own device (BYOD) experience.

Optional Network Management Solutions:

- **Aruba Central** provides centralized management of multiple Aruba instant networks and access switches via the cloud.
- **Aruba Airwave** for on-premise management of both wired and wireless networks, including third party manufacturers.
- **Clearpass Guest** gives secure guest access to customers and visitors and easily manage access privileges.
- **ClearPass OnBoard** lets BYOD and IT-issued devices connect safely to your network in compliance with security mandates.
- **ClearPass OnGuard** for secure enterprise-class endpoint protection, posture assessments and health checks that ensure devices are compliant before connecting
