Your Infrastructure as Code

A new approach to architecture. HPE Composable Infrastructure allows you to deploy IT resources as needed—quickly and for any workload—using powerful software. In minutes, stand up infrastructure that used to take weeks to deploy. A unified API with powerful tools from our partner ecosystem, is combined with software-defined intelligence, ensuring just the right amount of compute, storage and fabric.

IT Must Optimize Two Operating Environments

Apps for the Idea Economy
Built to drive revenue and new customer experiences leveraging mobility, big data and cloud-native logic. Apps require low latency and continuous access to high levels of uncertainty and change—think out how the
