Keep the business running

## HPE Small Business Solutions for File and Backup

You're giving your business everything you've got.
Don't let storage and backup problems get in the way.

Keep the business running
Store and backup applications, files, and data on-site.

Improve productivity
Enable employees to share and collaborate more easily and securely.

HPE Small Business Solutions have been validated and optimized for each workload use case.

Protect against the unknown

As a small to midsize business, you've got to keep moving at full speed. When everything's working as it should be, the future is bright. But in today's "digital everything" workplace, IT is challenged to provide a secure, controlled means of backing up files and application data so employees don't use "shadow IT" or "rogue cloud" file shares and leave files open to attack—and the business open to liability.

If you're using laptops, PCs, or even online cloud software to share and store critical data, you could be heading for some unexpected downtime. PCs crash. Laptops get stolen. Internet connections go down. If any one of these scenarios could put you out of business for a few hours—or a few days—it's time to consider upgrading to server computing.

Reduce downtime and increase reliability and productivity

Your solution starts with **HPE ProLiant servers**, powered by Intel® Xeon® processors and optimized and validated to run Microsoft® Windows Server®. Features such as centralized storage and security, data protection, 24x7 availability, and optional archiving and disaster recovery storage solutions help keep your business running and improve employee productivity.

Enhance peace of mind with recommended storage options for archiving and disaster recovery.

HPE RDX Removable Disk Backup System is a reliable, disk-based backup and recovery solution with unmatched portability, fast recovery, and easy integration into HPE Small Business Solutions for File and Backup.[5]

HPE StoreEver MSL 1/8 G2 0-drive Tape Autoloader meets demanding storage requirements for businesses needing unattended backup, disaster recovery, or archive capability that integrates with HPE Small Business Solutions for File and Backup. Learn more at **hpe.com/storage/autoloader**.

[1] Depending on the model.

[2] Based on external firm conducting cybersecurity penetration testing of a range of server products from a range of manufacturers, May 2017.

[3] HPE Secure Encryption is an optional service that requires one license per server. HPE Secure Encryption is not supported on HPE ProLiant MicroServer Gen10.

[4] HPE SMB Offers are regionally released as "Smart Buy Express Offers" in the U.S. and Canada, "Top Value Offers" in Europe, and "Intelligent Buy Offers" in Asia Pacific and Japan.

[5] Supported for configurations based on the HPE ProLiant MicroServer Gen10 and HPE ProLiant ML30 and DL20 Gen10 Servers.

Better together

HPE Small Business Solutions for File and Backup are:

- **Simple**—HPE Small Business Solutions are a one-stop shop and include pre-configured HPE ProLiant ML and DL servers and software,[1] making them easy to deploy. HPE Integrated Lights out (iLO) server management software enables local and remote monitoring and management. And HPE SMB Setup Software, now part of intelligent provisioning, provides a simple, guided process for installation that takes much less time and reduces the chance of errors.

- **Secure**—Protect against attacks and quickly recover from unplanned downtime with built-in security features that make **HPE ProLiant Gen10** the world's most secure industry-standard servers.[2] Running Windows Server on HPE ProLiant allows you to take advantage of Microsoft's IT innovations while reducing security risks and disruptions. You can add peace of mind with backup and archiving storage options, and protect data at rest with HPE Secure Encryption.[3]

- **Affordable**—Low-cost HPE Small Business Solutions make IT more accessible and easier to consume.[4] And HPE Subscription offers a worry-free, flexible option that packages best-in-class hardware, software, accessories, and services into a predictable monthly payment.

Enterprise proven—sized right for SMBs

The HPE Small Business Solutions portfolio is built on enterprise-proven products and solutions, right-sized to fit the needs of SMBs. HPE Small Business Solutions for File and Backup help you achieve these important business outcomes:

- Keep the business running with a central location for files, automated data backup, virus protection, and optional HPE Secure Encryption.

- Increase productivity by making files, email, and collaboration tools accessible from any device so employees can share and collaborate more easily.

HPE Pointnext services

HPE Pointnext has the expertise and experience to help you simplify operations and easily extend your IT staff, helping them do more with less. HPE Pointnext services help you innovate to keep ahead of risks like competitive and security threats. A variety of offerings—from advising on best practices and project-based engagements, to operational support services—keeps your environment running efficiently and reliably.

Choose your best option

With your choice of HPE ProLiant tower or rack servers with Microsoft Windows Server, you get the power, simplicity, and affordability to handle storage and backup with convenient configuration choices for organizations from 1 to 250 employees. Contact your HPE or authorized HPE Channel Partner to find out more, today.
