

SYNNEX Simplifies Device Deployment with Microsoft Autopilot Services

With Microsoft Integration Services like Autopilot, Autopilot White Glove, and Microsoft Managed Desktop, SYNNEX provides a deployment experience that is zero touch for IT.

Autopilot (Good)

Windows 10 devices are shipped directly to the end user, creating a timely experience with lowered shipping costs. Devices are registered to the end user Tenant, and can be managed through mobile device management.

Autopilot White Glove (Better)

With this service, devices come charged, pre-provisioned, and checked for DOA. Pre-provisioning shortens the first time deployment cycle by 75% shorter, making it only 5-10 minutes per device. This service is especially helpful for large scale deployments.

Microsoft Managed Desktop (Best)

With MMD, devices always arrive with the most recent Windows 10 OS version and security updates. Autopilot is included in this service.

Participating Manufacturers

Step 1

Contact SYNNEX! E-mail
BTOQuotes@synnex.com

Step 2

Our team registers the devices on your behalf

Step 3

We create the Autopilot profile and assign the devices to a group

Step 4

The devices are shipped directly to the end user

Step 5

The end user self deploys the devices
