

Work the way you want

Boost comfort and productivity
with Microsoft accessories

Why are ergonomics important?

1700

The number of hours the average office employee spends **in front of a computer each year.**¹

75%

of workers say that their company should be responsible for helping to **ensure their comfort** in the workplace.²

\$700k

The estimated annual savings from a **10% reduction in repetitive strain injuries** (RSIs).³

25%

Increase in performance from using an ergonomically designed workstation.³

Help your employees create a workspace that is just right for them

- › Keyboards with programmable buttons and customizable settings help save time with quick access to favorite docs, files or functions.
- › Mice with ambidextrous design, multiple scrolling options, and precise tracking help keep users comfortable so they can get more done.
- › Help reduce lost productivity due to repetitive strain injuries with Microsoft ergonomic keyboards and mice that let you work comfortably all day.
- › Mix and match accessories to suit a wide range of needs and abilities.
- › Choose from a Bluetooth or wired connection, depending on the situation.
- › Easy to set up, use, and manage, so you can focus on your business.
