

Performance that empowers

Change is happening faster than ever, and your devices have to work even harder to keep up. Discover how Microsoft Surface Laptop 4 is built to meet your needs—and everyone else's.

For IT teams

Take the friction out of remote support.

- **Smart data security** with removable SSD¹ and Surface TPM theft protections.
- **Streamlined onboarding** with zero-touch deployment and unified management.
- **Investment protection** with Microsoft Protection Plans.
- **Ultimate compatibility** with Windows 10 and Microsoft 365.

For employees

Adapt to every way they work.

- **Uncompromised multitasking** with the latest AMD Ryzen™ Microsoft Surface Edition and 11th Gen Intel® Core™ processors.
- **Seamless virtual collaboration** with low-light 720 HD front-facing camera, dual far-field studio mics, and immersive Dolby® Atmos Omnisonic speakers.
- **Uninterrupted productivity** with all-day battery life² and ultrafast charging.
- **Comfortable connectivity** with USB-C and USB-A ports, large glass trackpad, and crisp touchscreen PixelSense display.
- **Commute effortlessly** with an ultra-slim and lightweight design.

For leadership

Power growth with forward-thinking technology.

- **Reduce risk** with multifaceted security that protects devices and the data on them.
- **Improve operational** efficiency with scalable remote deployment and management.
- **Empower productivity** with the speed, performance, and ease of use to accommodate even the most demanding tasks.

Unlock the potential of the hybrid office today with Surface Laptop 4

When a business chooses Surface, they gain more than just a device—they gain a strategic enabler for their success. Surface devices with Microsoft 365 deliver an optimized, scalable, and secured business solution that can deliver cost savings and business benefits across employee productivity as well as device deployment, management, and security from device to cloud.
