

Rack IT Up: Pay Less for More Space

SAVE UP TO \$150*

On the purchase of a Vertiv™ VR Rack through June 30, 2021. See reverse side for applicable SKUs.

BENEFITS

More Usable Space

The Vertiv VR Racks offers 2.5" of additional space when compared to comparable racks. This means more room for **easier cable management**, **future proofing** for larger rack equipment as devices increase in size, and provide **additional airflow** to keep equipment from overheating.

No Tools Required

A tool-less design allows the rack to be easily installed and adjusted as device layout changes.

Rapid Deployments

All of the racks are available to ship in days.

Let's Talk

What is holding your critical IT equipment?
