

# Simplify your IT with Cisco

Is the complexity of technology holding you back? Let us introduce you to the concept of Simple IT. We can take your complex, expensive multi-vendor environment and simplify it so you can get back to the important things - your business, customers, and innovation.

## The Challenges of a Multi-vendor Environment

Trying to create an integrated IT architecture with a collection of disparate point solutions can create many challenges.

### These challenges include:

- Building and sustaining relationships with multiple vendors
- Staying up-to-date and knowledgeable on multiple products
- Spending countless hours on maintenance and software updates
- Using interfaces, dashboards, and systems that cannot talk to each other
- Sorting through multiple reporting engines to make routine decisions

## Introducing the Concept of Simple IT

IT Today	Simple IT
<b>Network</b> Meraki, Aruba, Juniper, HP, IBM, Solarwinds, Microsoft Office 365, Cisco	<b>Network</b> 
<b>Security</b> Symantec, Websense, AXIS, Meraki, McAfee, Barracuda, FireEye, Palo Alto Networks, Milestone, Cisco	<b>Security</b> 
<b>Collaboration</b> Avaya, Microsoft, Polycom, Huawei, Alcatel-Lucent, Aruba, Zoom, Citrix, Cisco	<b>Collaboration</b> 
<b>Data Center</b> Hewlett Packard, Nutanix, SimpliVity, Pivot3, Dell EMC, Brocade, VMware, Cisco	<b>Data Center</b> 

Simple IT leverages technology that is easy to deploy and manage:

Meraki

Security and simple cloud-based management of your entire network

Cisco Umbrella

On and off network security that deploys in just minutes and updates automatically

Cisco Spark

Messaging, meeting, and calling managed under one console in the cloud

Cisco HyperFlex™

Data center infrastructure that is fast to deploy, simple to manage, and easy to scale
