

A photograph of an Opengear SmartDC server rack. The rack is black with a prominent red horizontal band across the middle. The red band features the Opengear logo on the left, several status LEDs (CELL, POWER, CPU), and various ports including USB, FireWire, and Ethernet. The text 'SmartDC' is embossed on the black panels above and below the red band. The Opengear logo and 'A DIGI COMPANY' are visible in the bottom left corner of the rack's front panel.

Trade Up And Save

WHY SHOULD YOU UPGRADE YOUR LEGACY CONSOLE SERVERS FROM VERTIV/AVOCENT, RARITAN, LANTRONIX AND WTI?

Opengear *Smart* Out-of-Band management solutions leverage the latest cellular technologies for truly resilient networks.

TRADE-IN AND RECEIVE:

\$50 off per unit with purchase of ACM7000-L, ACM7000 or OM1200

\$250 off per unit with purchase of CM7100, IM7200 or OM2200

Opengear Network Resilience platform:

- Monitors network, detects and receives notifications on faults before they become failures.
- Utilizes embedded carrier-certified cellular modules for 4G-LTE access.
- Reduces deployment costs with software selectable pinouts.
- Provides flexibility with vendor-neutral PDU and UPS support.
- Manages 4 to 96 ports in 1 RU.
- Enables scalable out-of-band solution for global deployments.
- Monitors third party and Opengear devices with Lighthouse Centralized Management.

For more information on how to upgrade to a *Smart* OOB solution, contact your preferred reseller today or email us at sales@opengear.com

*Customer must provide proof of ownership of competitive products to qualify for the special pricing. Cisco ISR2900 terminal server qualifies for this promotion.
