

SYNNEX

# Integration Solutions

SYNNEX' comprehensive integration solutions enable your customers to take on bigger projects and focus on their core competencies. SYNNEX' solutions provide flexibility and scale to meet our resellers' expectations.

Our unsurpassed services and support can help your company add more value to your customized orders. You can partner with SYNNEX to provide turnkey solutions straight to your customer, easily and with confidence.

SYNNEX Integration Solutions offers a portfolio of configure-to-order programs, allowing our customers to create their own custom solutions.

## Why SYNNEX Integration Solutions?

- Dependable and reliable services
- Reduce your touch time and freight costs
- Reduce billable hours for high-price technicians
- Enable your company to offer integration solutions within your portfolio and take on small to large-scale integration projects, yet still focus on your core competencies.
- Allow your company to deliver fully integrated solutions direct from distribution to your end-user
- Differentiate yourself from the competition
- Accept with confidence projects beyond the scope of your resources
