

REDEFINE DATA PRIVACY & COMPLIANCE  
PROACTIVELY MANAGE  
SENSITIVE DATA FROM  
ANYWHERE

*Introducing*  
**EnForce™ Risk Manager**

The amount of data stored on electronic systems today is exploding and growing at an exponential rate. Data breaches, privacy concerns, and growing e-discovery costs continue to evolve how organizations approach controlling their business data while balancing worker productivity. Add to that, aged or poor data hygiene and this can further increase organizational inefficiencies, in aggregate costing billions annually.

EnForce™ Risk Manager is the only automated solution to proactively identify, categorize, and remediate private or sensitive data across the enterprise. Our solution offers the deepest level of insight and control of electronic data across all endpoints, including structured and unstructured data repositories. This enables organizations to improve business intelligence, ensure compliance, and mitigate many types of risks.

Our 360° visibility, enabled by our expertise in forensic security,  coupled with our patent-pending, next generation EnForce technology will allow you to:

- ▲ Find private and sensitive data
- ▲ Locate where it's stored
- ▲ Classify and quantify data assets
- ▲ Take action based on your business goals

# MANY CHALLENGES. SINGLE SOLUTION.

Data privacy, security, and digital investigations

Regulatory and policy compliance (PCI and HIPAA)

Data Analytics

Data storage optimization

E-discovery data governance best practices

## Features

EnForce Risk Manager enables you to identify sensitive data in vast volumes of data quickly and precisely with these features:

- ▲ **Control stale, aged, and duplicate data**  
Remove data that is considered to have no business value while simultaneously reducing storage costs
- ▲ **Automated remediation**  
Systematically mitigate risk through various data control actions
- ▲ **Distributed processing**  
Anonymous and asynchronous connections - via smart agent technology - and distributed processing allows for non-disruptive operations and enterprise scalability
- ▲ **Complete relational data intelligence**  
New EnForce technology provides the ability to forensically investigate data at the deepest levels of insight and control
- ▲ **Custom management dashboard**  
Ability to easily review and report on sensitive and aged data as it manifests throughout an organization

From beginning to endpoint.

## ABOUT US

Guidance (NASDAQ: GUID) exists to turn chaos and the unknown into order and the known-so that companies and their customers can go about their daily lives as usual without worry or disruption, knowing their most valuable information is safe and secure. The makers of EnCase®, the gold standard in forensic security, Guidance provides a mission-critical foundation of market-leading applications that offer deep 360-degree visibility across all endpoints, devices and networks, allowing proactive identification and remediation of threats. From retail to financial institutions, our field-tested and court-proven solutions are deployed on an estimated 25 million endpoints at more than 70 of the Fortune 100 and hundreds of agencies worldwide, from beginning to endpoint.
