My Meeting Video is a software client that turns your PC, Mac, Android or iOS tablet into a powerful videoconferencing device, enabling you to connect securely in high-quality audio and video with your colleagues and business partners across the globe. Enjoy a point-to-point call with one of your contacts, or host a team meeting in your personal conference room where participants can join from any standards-based video system like Polycom or Cisco, from Microsoft Skype for Business (Lync), or even from a web browser or a phone. Everything is hosted in the cloud with no need for any additional infrastructure.

## Enterprise User License

### MyMeeting iOS and Android Apps

- ▶ Join video meetings over the phone with a single click
- ▶ Automatically dials local number based on location
- ▶ Invite participants using your email contacts
- ▶ Schedule calls using your calendar

### GoldSeal VaaS Administrator Features:

- ▶ Centralized management of your subscription services
- ▶ Access real-time and historical usage information
- ▶ Add and remove users with drag-and-drop functionality
- ▶ Provide remote assistance for all virtual meeting rooms

### Microsoft Outlook Integration

*(Supports Office 2007, 2010 and 2013 on Windows 7 and 8).*

- ▶ Scheduling video meetings in your Virtual Meeting Room (VMR) is straightforward when you schedule directly in Microsoft Outlook.
- ▶ Call details and dial-in information will automatically be entered into the Outlook calendar of all meeting participants.

Contact your account manager for more information.

## Endpoint Subscriptions

### Video Network

Your videoconferencing unit connects to our cloud service through the internet connection you already have, but from there it plugs into our global video network with dedicated capacity and assured quality. This means that you can get the best quality possible on your domestic/international video calls, without having to invest in your own dedicated network.

### Unlimited Video Calling

Call often as you like to users both inside and outside of your company. Use screen sharing to show presentations or other documents. Communicate with anyone who has standards-based video, whether they are on the GoldSeal VaaS or not.

### Plug-and-Play Activation

We've made it easy for you to activate the subscription on the video unit yourself — no need to do any configuration. Plug the endpoint into the internet connection you already have, click on a link to couple the endpoint to the GoldSeal VaaS, and start calling on video immediately

### Unique Video Address

This will be your unit's "phone number". We've formatted it like an email address, so it's easy to remember and share with your contacts.

### Always-Updated Phone Book

A phone book that contains the addresses of all the other video units, users and virtual meeting rooms in your company. It's automatically delivered to your endpoint, so you don't have to type in addresses manually. Plus, you can search for anyone on the GoldSeal VaaS.
